

Kalygo

“We Make Generative A.I. Easy”

The Problem

Many A.I. systems and applications
besides GPT-3 & GPT-4 are missing
an accessible interface

The Solution

Kalygo is a clean, intuitive, and open-source interface into the world of Generative A.I. beyond chat applications

Features

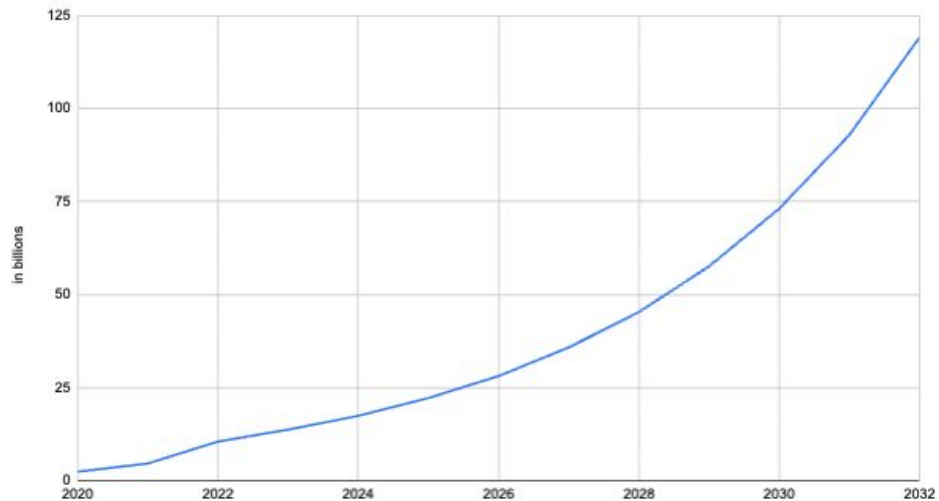

A suite of software that includes...

- 1) Batch LLM Job Processing
- 2) Reusable Prompting (with autocompletion)
- 3) Collaborative LLM output verification
- 4) Hyper-customized Marketing Campaign Generation
- 5) Flexible Chunking techniques for processing Big Data
